

Induction welding device **isoweld-B[®]**

World's first battery-powered induction welding device

Battery-powered induction welding device

Discover the revolutionary isoweld-B(battery)®, the ultimate solution for fast, efficiently, and safely fastening roofing materials using induction technology. Our portable, battery-powered device makes it easier than ever to get the job done—wherever you are, without the hassle of cables or external power sources.

The Convenience of Wireless Operation

Thanks to the powerful battery, you are fully mobile and no longer dependent on external power sources. Work faster and more flexibly, at any location!

Induction Made Easy

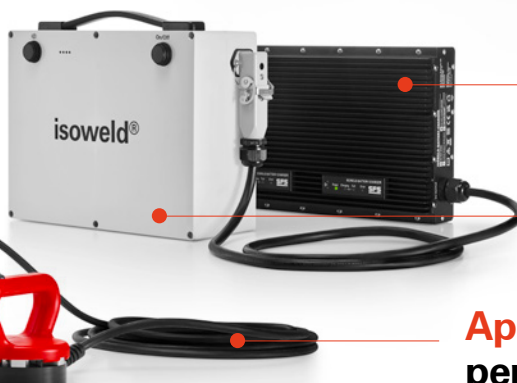

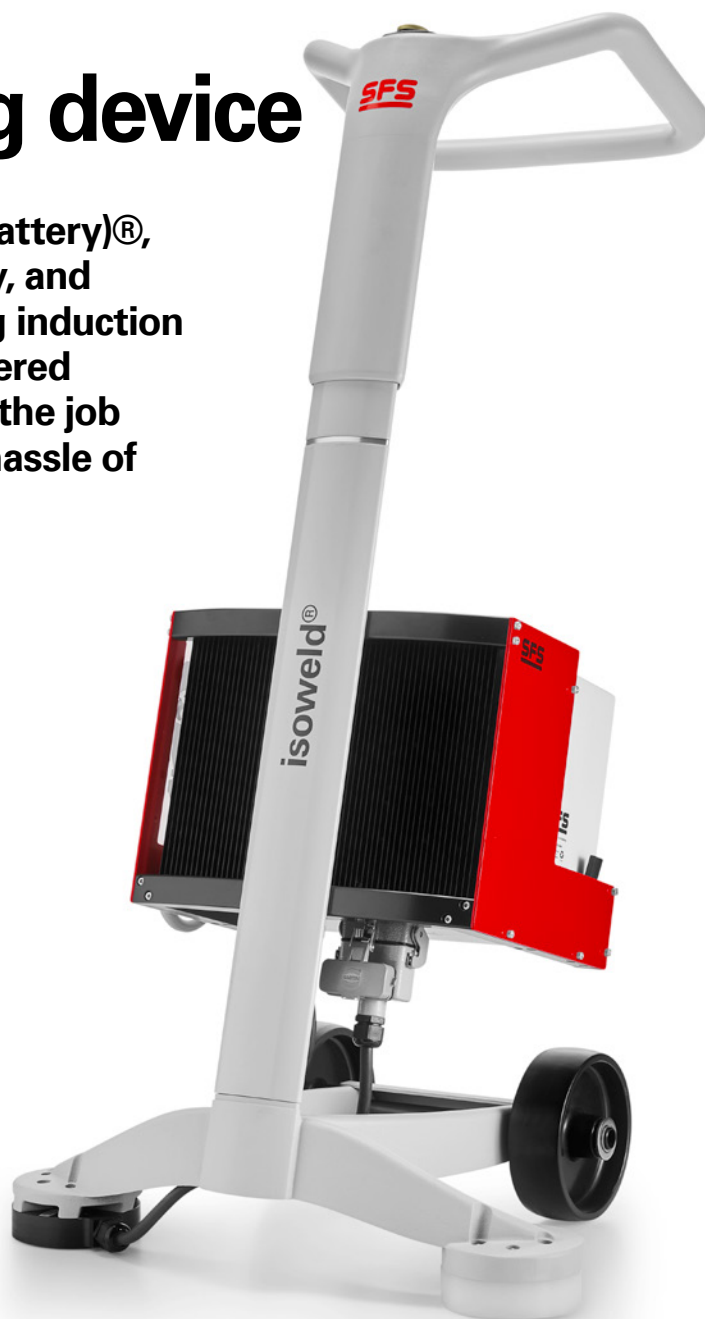

The isoweld-B® uses advanced induction technology to heat fastening points precisely, allowing you to install roofs with fewer fasteners and an even better seal against leaks.

Fast and Efficient

Reduce the number of required fastening points and decrease the chance of errors. With the isoweld-B®, you work not only faster but also more accurately.

Safe and Reliable

The unique induction technique minimizes cold bridges and enhances the durability of the roof. A better solution for a future-proof and circular roof!

Recharged in
60 minutes

2 batteries
and a charger

Approx. 350 welds
per charge
